A survey of research and fellowship positions available and tumor related publications have been initiated by our research and publication committees, respectively. We have reviewed the abstracts submitted for the open Scientific Session for the CNS New York meeting and will be sponsoring our first workshop on "The Management of Recurrent Meningiomas" at that meeting. We would appreciate the opportunity to serve the American Association of Neurological Surgeons in a similar capacity.

I respectfully request your consideration for making the existing section of the CNS a Joint Section with the AANS. The bylaws have been written to conform with the other sections desiring joint status. I have also included herein a petition signed by AANS members to support our request. Please let me know if you need any further information and when the Executive Committee of the AANS will consider our request.

Sincerely,

Mark L. Rosenblum, M.D.
